Brady Golomb

bradyg@seas.upenn.edu | (972) 207-8757 | Permanent: Elmhurst, IL 60126 | Portfolio: https://tinyurl.com/bradygolombep

EDUCATION

UNIVERSITY OF PENNSYLVANIA, School of Engineering and Applied Science — Philadelphia, PA
Master of Science in Engineering, Robotics Engineering (Accelerated Program)
Expected May 2028
Bachelor of Science in Engineering, Mechanical Engineering (Concentration: Dynamics, Controls, and Robotics)
Expected May 2028 Cumulative GPA: 3.83/4.0

RELEVANT COURSEWORK

ENGINEERING: Mechanical Design, Programming Languages & Techniques, Physics: Electricity & Magnetism and Mechanics, Thermal-Fluids Engineering, Thermodynamics, Dynamics, Statics and Strengths of Materials

MATH: Multivariable Calculus, Vector Calculus, Differential Equations, Linear Algebra, Graph Theory

EXPERIENCE

PENN ASSISTIVE DEVICES AND PROSTHETIC TECHNOLOGIES (ADAPT) — Philadelphia, PA — September 2024 - Present
<u>Assistive Technology Engineer</u>
- Collaborate with team to design and build innovative medical devices for athletes with disabilities
- 2024: Lead Engineer developing adapter for bikers with prosthetic limbs for improved accessibility—finished one adapter during school year, continuing to develop more
- 2025: Project Lead partnering with PCAS to design adaptive shoelaces to support physically disabled athletes' autonomy
- Utilizing CAD software, rapid prototyping techniques, and user feedback to refine designs

PENN TRACK AND FIELD — Philadelphia, PA — August 2024 - Present
<u>Walk-On Varsity Athlete</u>
- Compete as a Division I track athlete in the Ivy League, contributing as a championship scorer while balancing 20+ hours/week of training with academic excellence—highlighting discipline, drive, and exceptional time management.

PENN ATHLETICS WHARTON LEADERSHIP ACADEMY (PAWLA) — Philadelphia, PA — August 2024 - Present
<u>Member</u>
- Participate in a Wharton-led program to enhance leadership, communication, and soft skills for team and career success

CARROLL ROBOTICS — Southlake, TX — August 2022- January 2024
<u>Robotics Team Leader and Lead Engineer</u>
- Led a team in designing, building, and programming competition robots; secured two VEX World Robotics Championship qualifications, highest placing was 11th globally among 11k+ teams
- Developed expertise in mechanical engineering, coding, and project management while fostering collaboration, innovation, and problem-solving in high-pressure, competitive environments

TECHNICAL SKILLS

Onshape Python OCaml Java SolidWorks Arduino MATLAB Google Colab Logger Pro

AWARDS

Princeton Prize for Race Relations Winner 2024
